Contents of Volume 2

NUMBER 1, JANUARY 1975

GEORGE A. OJEMANN. Guest Editor's Note.	1
J. P. MOHR, W. C. WATTERS, AND G. W. DUNCAN. Thalamic Hemorrhage and Aphasia	3
JASON W. BROWN. On the Neural Organization of Language: Thalamic and Cortical Relationships	18
J. M. VAN BUREN. The Question of Thalamic Participation in Speech Mechanisms	31
MANUEL RIKLAN AND IRVING S. COOPER. Psychometric Studies of Verbal Functions Following Thalamic Lesions in Humans	45
FREDERIC L. DARLEY, JOE R. BROWN, AND WENDELL M. SWENSON. Language Changes after Neurosurgery for Parkinsonism.	65
GEORGES SCHALTENBRAND. The Effects on Speech and Language of Stereotactical Stimulation in Thalamus and Corpus Callosum	70
PAUL FEDIO AND JOHN M. VAN BUREN. Memory and Perceptual Deficits During Electrical Stimulation in the Left and Right Thalamus and Parietal Subcortex	78
GEORGE A. OJEMANN. Language and the Thalamus: Object Naming and Recall During and After Thalamic Stimulation	101
PAPERS TO APPEAR IN FORTHCOMING ISSUES	121

NUMBER 2, APRIL 1975

MICHAEL STUDDERT-KENNEDY. Two Questions	123
HARVEY M. SUSSMAN AND PETER F. MACNEILAGE. Studies of Hemispheric Specialization for Speech Production	131
TADANOBU TSUNODA. Functional Differences Between Right- and Left-Cerebral Hemispheres Detected by the Key-Tapping Method	152
PAUL SATZ, DIRK J. BAKKER, JETTY TEUNISSEN, RON GOEBEL, AND HARRY VAN DER VLUGT. Developmental Parameters of the Ear Asymmetry: A Multivariate Approach.	171
R. J. PORTER JR. AND CHARLES I. BERLIN. On Interpreting	

Developmental Changes in the Dichotic Right-Ear Advantage	186
M. P. BRYDEN. Speech Lateralization in Families: A Preliminary Study Using Dichotic Listening	201
DONALD SHANKWEILER AND MICHAEL STUDDERT-KENNEDY. A Continuum of Lateralization for Speech Perception?.	212
SHEILA BLUMSTEIN, HAROLD GOODGLASS, AND VIVIEN TARTTER. The Reliability of Ear Advantage in Dichotic Listening.	226
BOOK REVIEW	
SHEILA E. BLUMSTEIN. <i>A Phonological Investigation of Aphasic Speech Reviewed by André Roch Lecours and David Caplan.</i>	237
ERRATUM	255
PAPERS TO APPEAR IN FORTHCOMING ISSUES	256

NUMBER 3, JULY 1975

WILLIAM H. GADDES AND DAVID J. CROCKETT. The Spreen-Benton Aphasia Tests, Normative Data as a Measure of Normal Language Development.	257
ERIN WAGENAAR, CATHERINE SNOW, AND RONALD PRINS. Spontaneous Speech of Aphasic Patients: A Psycholinguistic Analysis	281
R. D. KENT AND K. L. MOLL. Articulatory Timing in Selected Consonant Sequences	304
MARVIN N. GOLDSTEIN, MARK BROWN, AND JOSHUA HOLLANDER. Auditory Agnosia and Cortical Deafness: Analysis of a Case with Three-Year Followup	324
HOWARD GARDNER, RICHARD STRUB, AND MARTIN L. ALBERT. A Unimodal Deficit in Operational Thinking	333
MARLENE OSCAR-BERMAN, EDGAR B. ZURIF, AND SHEILA BLUMSTEIN. Effects of Unilateral Brain Damage on the Processing of Speech Sounds	345

DENNIS L. MOLFESSE, ROBERT B. FREEMAN, JR., AND DAVID S. PALERMO. The Ontogeny of Brain Lateralization for Speech and Nonspeech Stimuli	356
SUMIKO SASANUMA. Kana and Kanji Processing in Japanese Aphasics	369
PAPERS TO APPEAR IN FORTHCOMING ISSUES	384

NUMBER 4, OCTOBER 1975

ANDREW KERTESZ AND PATRICIA MCCABE. Intelligence and Aphasia: Performance of Aphasics on Raven's Coloured Progressive Matrices (RCPM)	387
FRIEDRICH SANIDES. Comparative Neurology of the Temporal Lobe in Primates Including Man with Reference to Speech . .	396
ELEANOR M. SAFFRAN AND OSCAR S. M. MARIN. Immediate Memory for Word Lists and Sentences in a Patient with Deficient Auditory Short-Term Memory	420
A. DAMIEN MARTIN, NANCY H. WASSERMAN, LAURIE GILDEN, LOUIS GERSTMAN, AND JOYCE A. WEST. A Process Model of Repetition in Aphasia: An Investigation of Phonological and Morphological Interactions in Aphasic Error Performance . .	434
JEAN BERKO GLEASON, HAROLD GOODGLASS, EUGENE GREEN, NANCY ACKERMAN AND MARY R. HYDE. The Retrieval of Syntax in Broca's Aphasia	451
MAURENE DENNIS AND BRUNO KOHN. Comprehension of Syntax in Infantile Hemiplegics after Cerebral Hemidecortication: Left-Hemisphere Superiority	472
ROBERT L. KEITH AND ARNOLD E. ARONSON. Singing as Therapy for Apraxia of Speech and Aphasia: Report of a Case	483
ROBERT D. NEBES. The Nature of Internal Speech in a Patient with Aphemia	489

Information for Contributors

Brain and Language publishes original research articles, case histories, critical reviews and scholarly notes; each contribution will be concerned with human language or communication (speech, hearing, reading, writing, or non-verbal modalities) related to any aspect of the brain or brain function. Each will have theoretical import, either formulating new hypotheses, or supporting or refuting new or previously established ones. The interdisciplinary focus includes the fields of neurology, linguistics, neurophysiology, psychology, neuroanatomy, psychiatry, neurosurgery and speech pathology. *Brain and Language* will accept material that has not been published elsewhere and that is not currently under review by other publications. Manuscripts of several different types are solicited: regular articles, single or multiple case history studies, critical reviews of books of interest to the journal's readership, and short (limited to under 10 pages typed) scholarly notes and comments discussing issues of topical interest.

Manuscripts should be submitted to either:

Editor: Harry A. Whitaker, Ph.D.

Department of Psychology

University of Rochester

Rochester, New York 14627

Associate Editor: Alan B. Rubens, M.D.

Aphasia Center, Hennepin County Hospital

5th and Portland South

Minneapolis, Minnesota 55415

Form of Manuscript. Authors should submit manuscripts in *triplicate* (one original and two copies), typewritten, double-spaced on one side of 8.5 × 11 in. white paper. The original and two copies of all artwork, tabular material, photographs, etc. must also be included. All pages should be numbered consecutively.

Page 1 should contain the article title, author(s) name(s) and affiliation(s), abbreviated form of the title for the running page heading (not to exceed 35 characters including letters and spaces) and the complete mailing address of the author to whom all correspondence should be sent. *Page 2* should contain a short *abstract* of approximately 100 words.

Papers must be written in English. Language data may be given in English when clearly identifiable, otherwise should be transcribed into the phonetic alphabet of the International Phonetic Association (IPA).

Figures should be numbered in order of appearance (with Arabic numerals) and should have short descriptive captions (typed double-spaced on a separate page). Line drawings must be originals in black India ink on white paper, on polyester drafting film, or comparable glossy black and white photographs. Lettering should be uniform, professionally done, and large enough to be fully legible after a 50–60% reduction in printing.

Tables should be numbered in order of appearance (with Arabic numerals); they should be typed double-spaced on a separate page. Each table should have a short descriptive title typed (double-spaced) above the table. Footnotes to tables (indicated by superscript lower case letters, ^{a,b}, etc.) should be typed (double-spaced) at the end of the table. Keep in mind the dimensions of the journal when planning the number of columns in a table.

Footnotes to the text should be kept to a minimum; when necessary, they should be indicated by superscript Arabic numerals, ^{1,2}, etc., cited consecutively throughout the article starting with the title. They should be typed double-spaced on a separate page.

References should be cited in the text by surname of the author and the publication date in parentheses, e.g., Goldstein (1948) or (Russell and Espir, 1961). If more than one paper was published by the same author in a given year, the correct style is Broca (1861a) or (Broca, 1861b).

References should be listed alphabetically, typed double-spaced at the end of the article. All references cited in the text must be listed at the end of the paper. Journal titles should be written out in full, not abbreviated. Note the following examples.

- Allison, R.S. 1962. *The Senile Brain*. London: Edward Arnold.
- Koh, S.D., Vernon, M., & Bailey, W. 1971. Free-recall learning of word lists by prelingual deaf subjects. *Journal of Verbal Learning and Verbal Behavior*, **10**, 542-547.
- Luria, A.R., & Tsvetkova, L.S. 1970. The mechanism of "dynamic aphasia." In M. Bierwisch & K.E. Heidolph (Eds.) *Progress in Linguistics*. The Hague: Mouton. Pp. 187-197.

(Use underlining for journal and book titles only.)

Proofs. Galley proofs will be sent to the designated author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty (50) reprints without covers will be provided free of charge for articles. Additional reprints may be purchased; an order form will be included with proofs.
